Arham Khan

Full Stack Developer

+91 9987724721 | Mumbai | arhamwhoo@gmail.com | https://github.com/arhamwho

PROFILE

Computer Science student, developer, and builder who enjoys turning ideas into real-world products. From full-stack web applications to mobile apps and AI-powered features, I'm always exploring new technologies and finding smarter ways to solve problems. I believe in learning by building, experimenting beyond the basics, and creating software that's not just functional, but actually useful.

EMPLOYMENT HISTORY

Full Stack Developer

08/2025 - Present

Global Solutions America

- Contributed to software development tasks and project implementation using relevant web technologies.
- Worked on application features, debugging, and improving user interface functionality.
- Collaborated on technical requirements and development tasks to support project delivery.

Web Developer

11/2024 - 06/2025

Al Maiaar Al Zahabi

- Developed a real estate management platform to support property-related operations and information management.
- Built user interfaces for managing property information and presenting real estate data.
- Implemented platform features based on business requirements and operational workflows.
- Worked on application functionality, responsive layouts, and usability to support day-to-day property management activities.

PROJECTS

GSA LMS — Learning Management System

- Developed a learning management platform with separate interfaces for students, instructors, and administrators.
- Designed course management workflows and instructor interfaces for uploading learning materials.
- Integrated Firebase Authentication and worked on media storage and role-based access workflows.
